PROFESSIONAL SUMMARY

Backend Developer specialized in Java 21 and Spring Boot 4, with a solid command of Layered Architecture and MVC patterns. Bringing over a decade of experience leading operations in international environments, offering unique professional maturity, analytical capacity, and the ability to solve technical problems under pressure. Focused on developing secure and scalable REST APIs. C1 English (Official School of Languages - EOI).

TECHNICAL SKILLS

- **Backend:** Java 21, Spring Boot 3 & 4, MVC, Layered Architecture, REST APIs, JWT, JPA/Hibernate.
- **Frontend:** React, TypeScript, JavaScript.
- **Data & Infrastructure:** PostgreSQL, PL/SQL, MySQL, Docker, Git/GitHub, Linux, AWS.
- **Security & AI:** Google Cybersecurity, n8n, Prompt Engineering (LLMs), CI/CD (GitHub Actions).

PROJECTS

- **Personal Portfolio API (jortiz.dev):** Production backend deployed on VPS using Docker and Nginx. Features real-time AI content moderation and dynamic documentation with Swagger.
- **TPV System:** Comprehensive management system developed under a Layered Architecture, implementing advanced security with JWT, Role-Based Access Control (RBAC), and optimized data persistence.

PROFESSIONAL EXPERIENCE

Software Developer (Internship) | Aliqindoi Circular Solutions (Málaga) | Nov 2025 – Jan 2026

- Process optimization through n8n automation workflows and API integrations.

AI Data Trainer / QA (Freelance) | Outlier · TELUS International | Oct 2024 – Feb 2025

- Quality assurance and logical evaluation of LLM models in English, ensuring accuracy and bias mitigation.

Operations Manager & Senior Chef | Gran Hotel Miramar · Amàre Hotels | 2014 – Jan 2024

- Led international teams and managed high-volume workflows in fast-paced environments.
- Functional expert in business logic and ERP system operations for the hospitality industry.
